

# **“The show must go on” ABEX 2022 - Post-NAB**

**Michal Kuhn**  
**Solutions Architect @ Qumulo Inc.**

# M&E data challenges

- Higher resolution content 4K, 8K, 16K and HDR continues to rapidly expand to petabyte levels
- Secure, accessible, high capacity file storage
- Enhance collaboration and productivity for remote editorial workflows
- Remote work environment must function like the studio environment
- Deliver new content more frequently with unmovable production timelines
- Quick access to transcode, package, and distribute media

Shared Nothing Architecture; Seamlessly Scale Compute and Storage

10/25/40/100 Gb Ethernet

**Enterprise Proven** in the most secure and complex use cases on the globe

**Scale Across** on-prem, and the cloud

**Real-time Analytics** eliminate data blindness

**Take Control** and automate common tasks

**Customer Delight** from buying, to installation to day-to-day use. Qumulo has redefined the customer experience.

# Radical Simplicity

The new way to manage content at scale, anywhere.

**Store** securely across on-prem and in the cloud with dynamic scaling in a single namespace.

**Manage** easily with real-time visibility and predictive caching to speed productivity.

**Build** automated workflows and empower creative teams to work anywhere in the world.

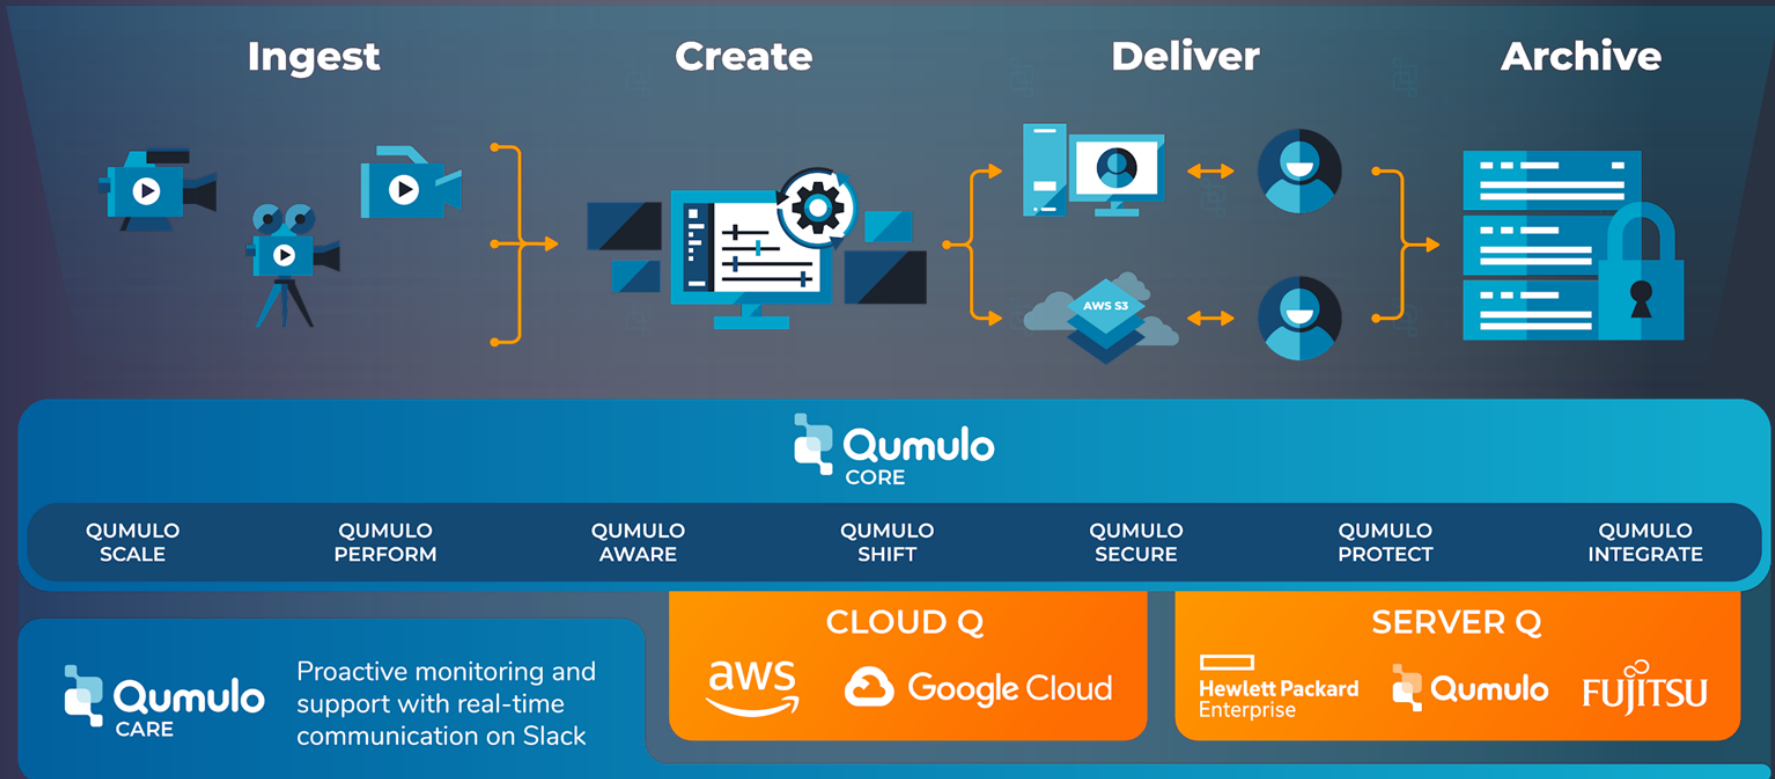

# Qumulo benefits for M&E

Capture, collaborate, edit and distribute file data globally

- Efficiently stores BOTH large and small files
- Large 4K, 8K and 16K video files
- Small files, for gaming or metadata
- Simple scalability to grow to petabyte-scale capacities
- Built-in enterprise-level data security and protection for valuable assets
- Simplify resource management and reduce costs with real-time analytics
- Cloud-native file data platform delivers multiple cloud options
- Enhance collaboration
- Burst rendering to the cloud
- Award winning Qumulo Customer Success support you can count on

# Manage full content lifecycle with Qumulo

# Qumulo with PAM

## Qumulo's Flexible File Data Platform Meets Changing Production Requirements

Instead of dedicated direct attached storage, Strawberry allows the use of shared Qumulo file storage. This unlocks collaboration between Avid™, FCP, Premiere editors, and other production workflows without having to constantly copy data back and forth between dedicated and shared storage. Save time and increase artist productivity. Share projects and assets easily among different users and applications seamlessly

### KEY BENEFITS

Manage and share projects and assets in Avid(™) Media Composer, Premiere, Final Cut and more in a shared file system.

- Scale-out to billions of files and petabytes of storage capacity in a single shared file system instead of silos of storage, organized by Strawberry

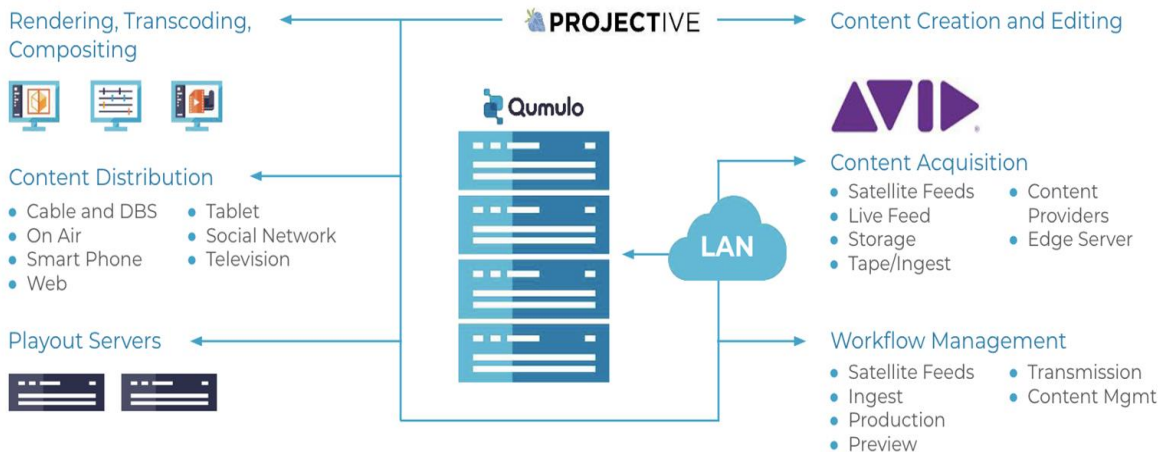

- Simplify storage management, reduce duplication, and save time lost searching for content

- Provide real-time visibility into data and storage solving data management Problems

- Avid(™) project bin locking

- Project analytics and visualization

### Qumulo and Projective Strawberry PAM Workflow
