

## Post NAB 2022 – Video

Ismet Bozkurt

Senior Sales Executive EE

# abex

Associated Broadcast Experts

# MediorNet Distributed Architecture

## MediorNet IP

- One network infrastructure for all Media essences as well as for **internal** and **external** signals
- Directly interface with **IP native facilities**

## MediorNet TDM

- Easy **use/operation** - no IP knowledge necessary
- **Routing** fabric and **processing** included

# MediorNet Distributed Architecture

		MN- TDM	MN- IP
Ability to <b>scale</b> your Inputs and Outputs for small to large systems <b>efficiently</b>	▶	✓	✓
Important <b>savings</b> in <b>wiring</b> across the facility - few <b>fiber links</b> over tones of <b>copper</b>	▶	✓	✓
No requirements for <b>additional Distributed Amplifiers</b> or <b>Embedders/De-embedders</b>	▶	✓	✓
<b>Format agnostic</b> – can support any HD, 3G or UHD signals	▶	✓	✓

# Why is a Distributed Architecture important ?

MediorNet **TDM**

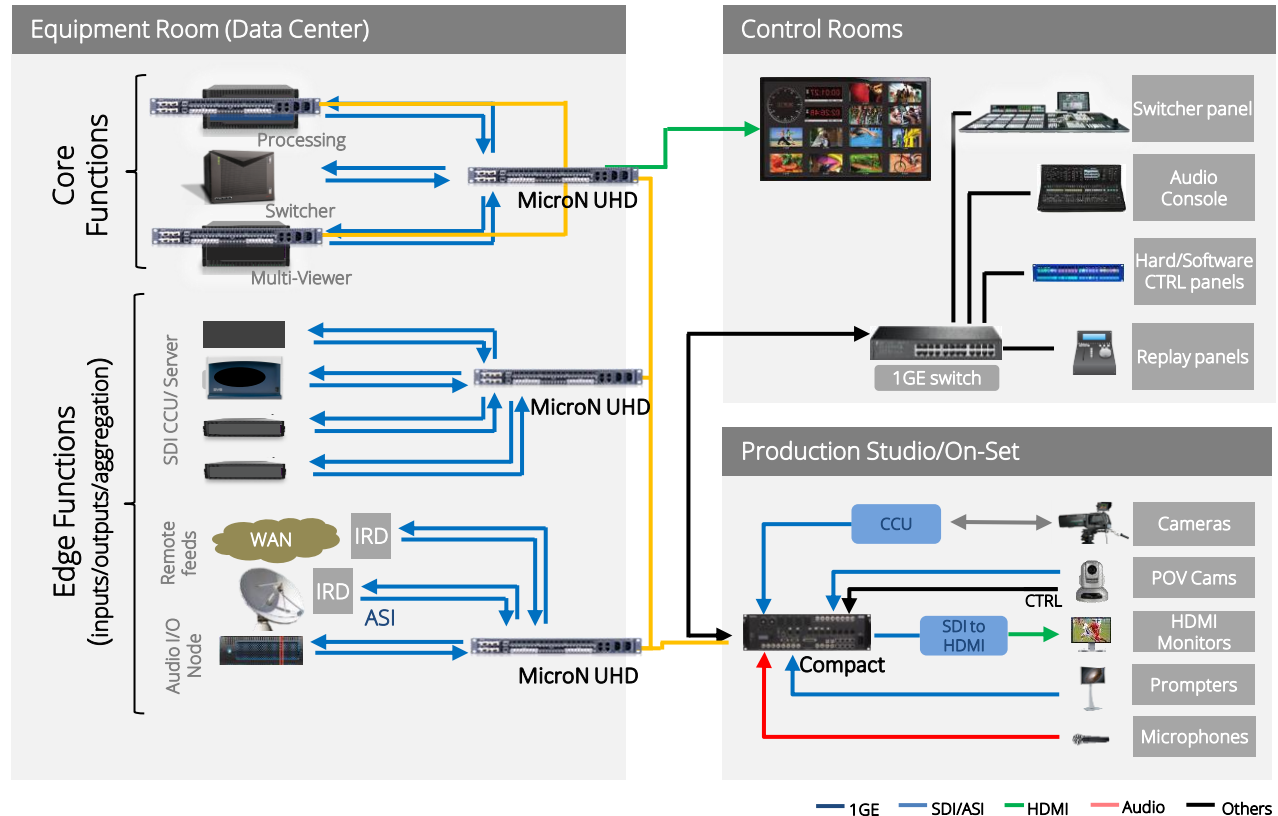

# Traditional SDI Routing Solution

# MediorNet: Distributed SDI Routing Solution

- MediorNet MicroN / MicroN UHD for a distributed, flexible infrastructure
- With a significantly reduced amount of cabling
- Integrated processing reduces complexity and need for external devices

# Distributed SDI Architecture

## Star Topology

# Distributed SDI Architecture

# Distributed SDI Architecture

Meshed Topology

# Long haul transport in MediorNet TDM

- MediorNet TDM supports **any kind of topology**
- Various options of fiber optical modules to bridge short and long distances

# MediorNet TDM

## Product Highlights

# MediorNet TDM Product Portfolio

MicroN UHD

MetroN

Compact

MicroN

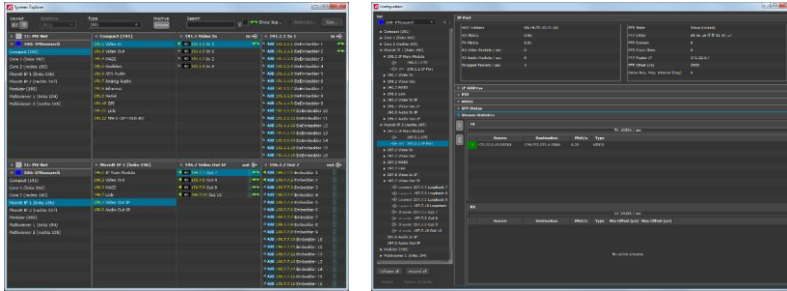

- 
- **MicroN UHD** UHD Signal Gateway and Processing Platform  
*400G MediorNet Link capacity – up to 12G SDI (UHD) – 48 SDI in 1RU*
  - **MetroN** MediorNet TDM Core Router  
*320G MediorNet Switching – up to 64 MediorNet Links*
  - **MicroN** 3G Signal Gateway and Processing Platform  
*80G MediorNet Link capacity – up to 3G SDI – 24 SDI in 1RU*
  - **Compact Pro** Multi-Format Stage-Box  
*Flexible & ruggedized Fiber Options – 16 SDI – Various Audio, Video and Data Interfaces*

# MicroN UHD – Extended Capabilities

# Easy Configuration & Control

Video Sources & Destinations Audio Sources & Destinations Macros

- MediorWorks allows easy configuration, monitoring and live operation
- Integrated powerful and easy MultiViewer editor 
- Open and fully controllable by broadcast control systems via Ember+, Probel and SNMP
- MediorNet Control Application for Riedel's SmartPanel series (2300 series) we also provide a router control panel

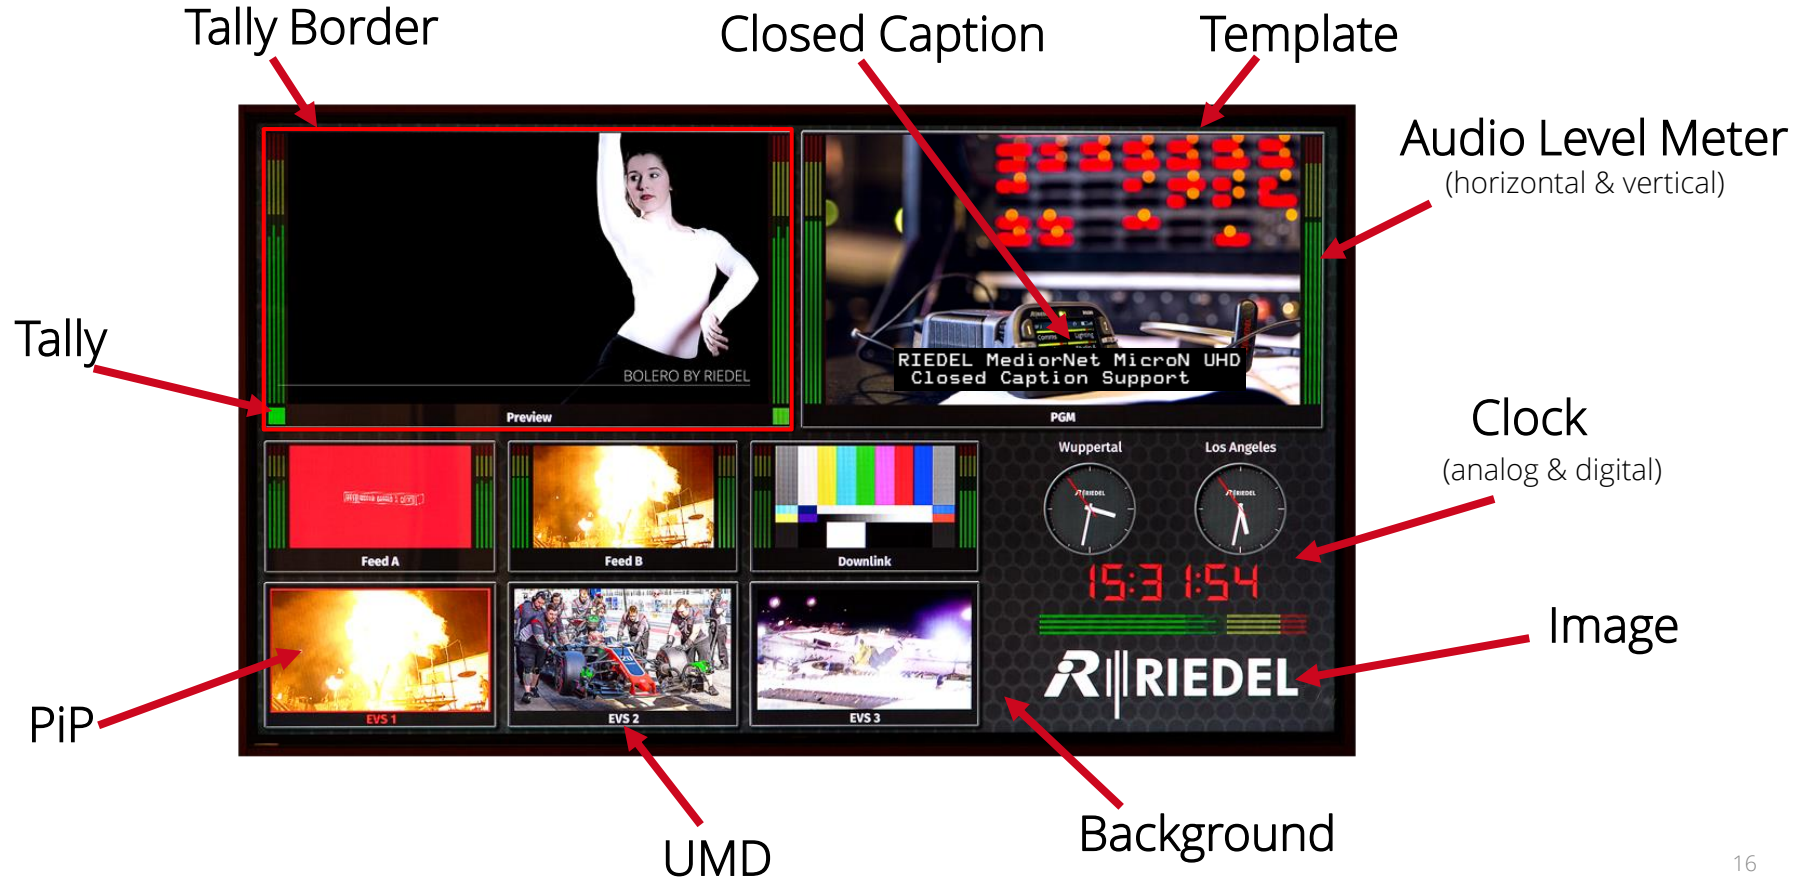

# MediorNet TDM

Multiviewer

# MediorNet MicroN UHD MultiViewer – Powerful Widget Library

# MicroN UHD MediorNet MultiViewer App

Fully compatible with the MediorNet ecosystem

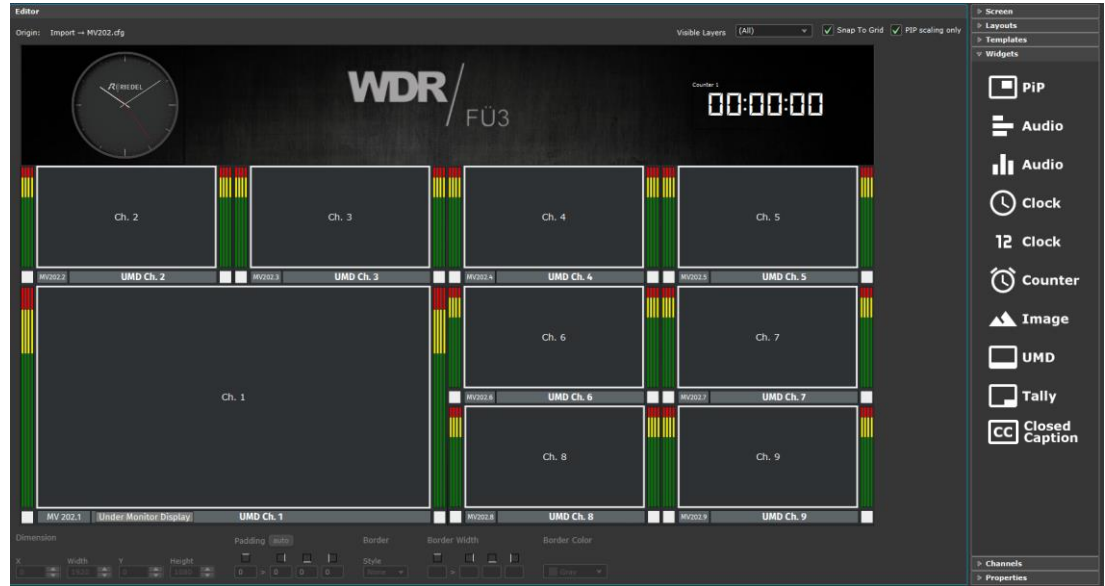

- Can be integrated to any MediorNet system
- Uses **any** in the system available **video** signal as source
- MicroN UHD **hardware** can be **repurposed**
- **Flexible** licensing mechanism

It's a **MediorNet** node!

# MediorNet MultiViewer – Easy Configuration & Operation Workflow

- Full Flexible Layout options
- Powerful and easy use configuration tool
- Distributed configuration storage, system wide counters and time code
- Full 3<sup>rd</sup> party interfaces control

# MicroN UHD MultiViewer

- Fully integrated in the MediorNet ecosystem
- Up to 36 PiPs on 8 MultiViewer Outputs
- Easy to use & flexible configuration tool
- Powerful MediorNet widget library
- Low noise operation

MediorNet **MicroN UHD**

# MediorNet TDM

Processing

# MediorNet TDM Video Processing

## Integrated Signal Processing and Conversion

Frame Store & Synchronizer  
Test Pattern Generator  
Timecode Insertion  
Caption

Embedder & De-embedder  
Sample Rate Converter  
Test tone Generator

## MicroN Processing App

9x PiP & 2x Output MultiViewer

2x Up/Down/Cross Conversion

4x Color Correction

Integrated Signal Processing and Conversion

# Riedel MediorNet TDM Key differentiating factors

## Distributed Scalable Solution

- Easy to scale (add and remove devices)
- Flexibility

## Integrated Processing

- Integrated Glue and MultiViewer
- Software definable hardware
- Processing as networked function

## Easy Operation

- Plug and play installation
- Integrated monitoring and control via MediorWorks
- Powerful 3<sup>rd</sup> party APIs for system integrations

## Less Cable & Extenders

- MediorNet devices close to equipment allow less cabling
- Fiber network reduces weight and allows higher distances

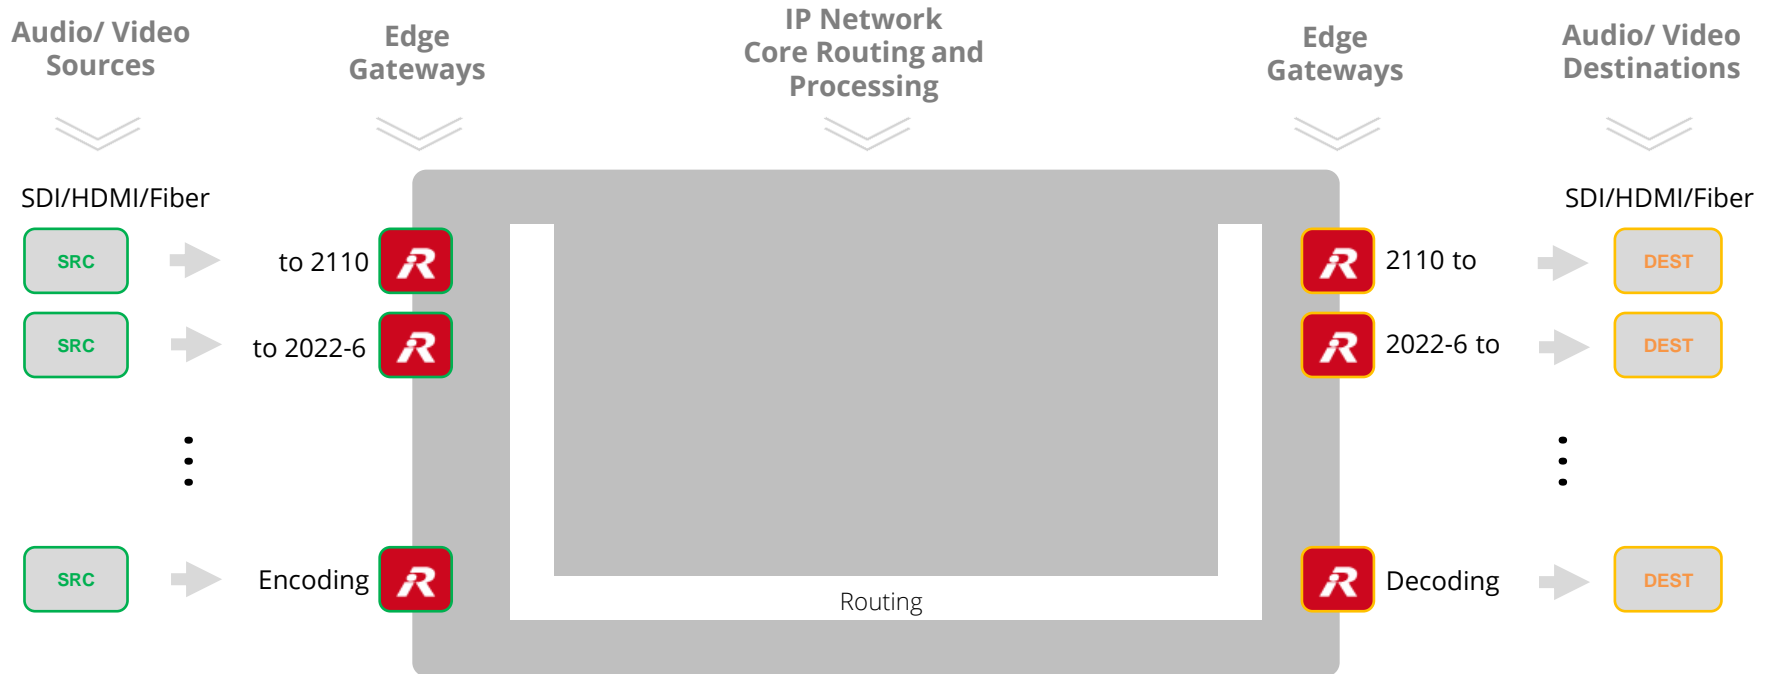

# Why is a Distributed Architecture important ?

MediorNet IP

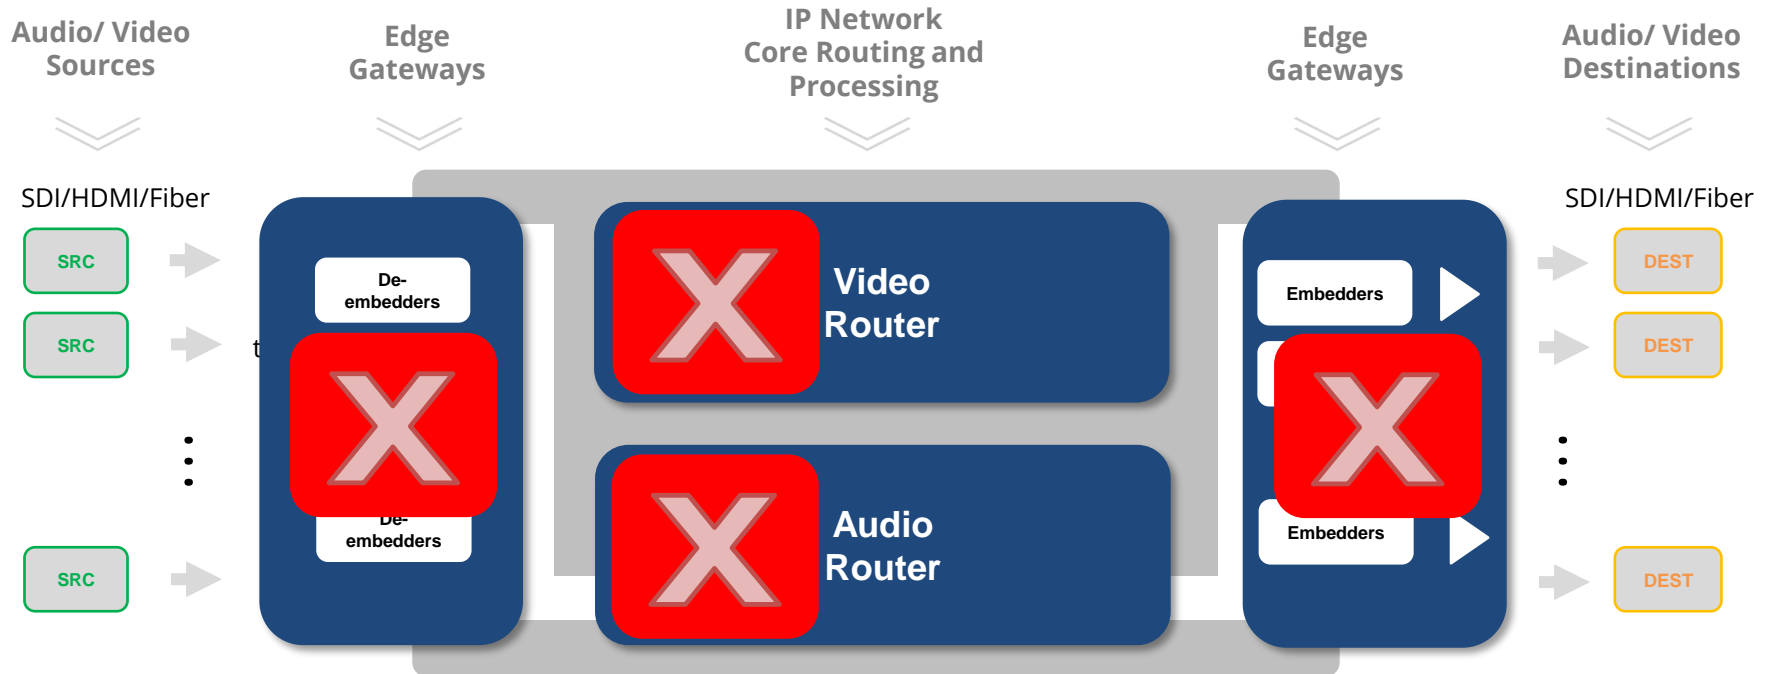

# Riedel Proposition

A solution to **connect** your equipment into a core IP infrastructure

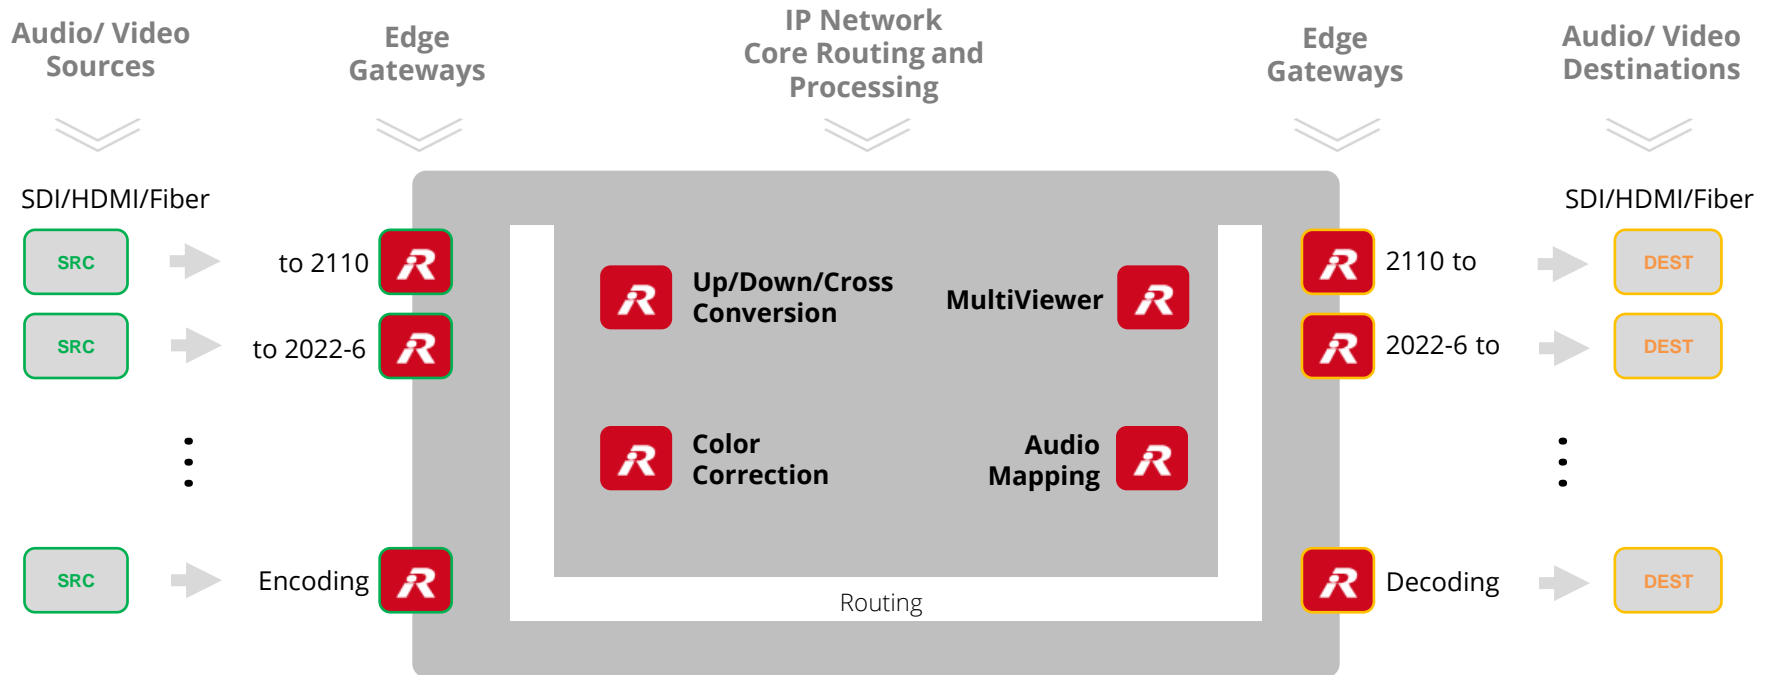

# Riedel Proposition

A solution to **connect** your equipment into a core IP infrastructure

# Riedel Proposition

A solution to **connect** your equipment into a core IP infrastructure

# MediorNet IP

What makes Riedel  
Proposition Unique ?

# What sets us apart ?

Use of **SFP** Form-Factor with  
**Miniaturised** hardware

Benefits:

- ✓ Space, Cabling, Power & Cost saving
- ✓ Increased agility with flexible hardware I/Os and software-defined functionality

# What sets us apart ?

Edge Devices

**Versatile** hardware

Benefits:

- ✓ Space, Cabling, Power & Cost saving
- ✓ Increased agility with flexible hardware
- ✓ I/Os and software-defined functionality

# MN IP Key differentiating factors

## Modular Approach

- ✓ Software-Defined Solution
- ✓ 2 channels per device
- ✓ Low failure block
- ✓ SDI, HDMI & Fiber I/O's

## Small Form Factor Technology

- ✓ 64 Channels in a single rack unit
- ✓ "0" rack space with edge devices
- ✓ Light weight solution

## Low Power Consumption

- ✓ Saving up to 60% of the energy
- ✓ Low emission
- ✓ Low operational costs

## Less Cable & Extenders

- ✓ Distributed Network
- ✓ Use fiber all the way to the devices

PREV

# MN IP MultiViewer

Available as 4, 9 and 16 ST2110 inputs and one MultiViewer output

High quality image scaling

Highest density in the market

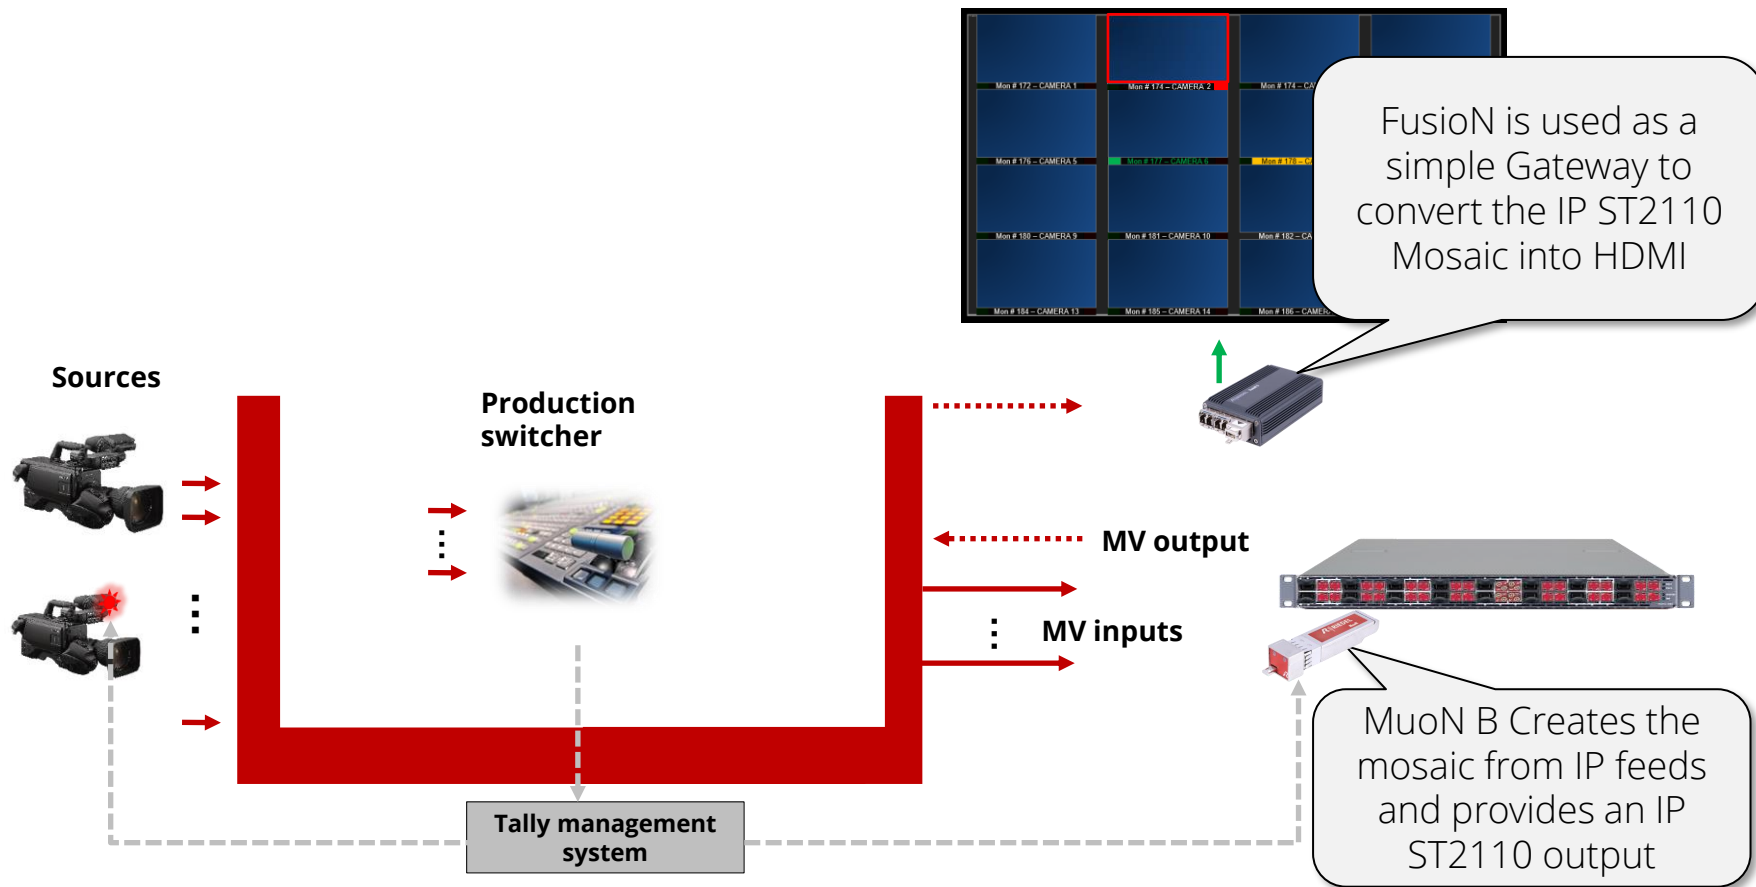

APP can be used with MuoN B or FusionN

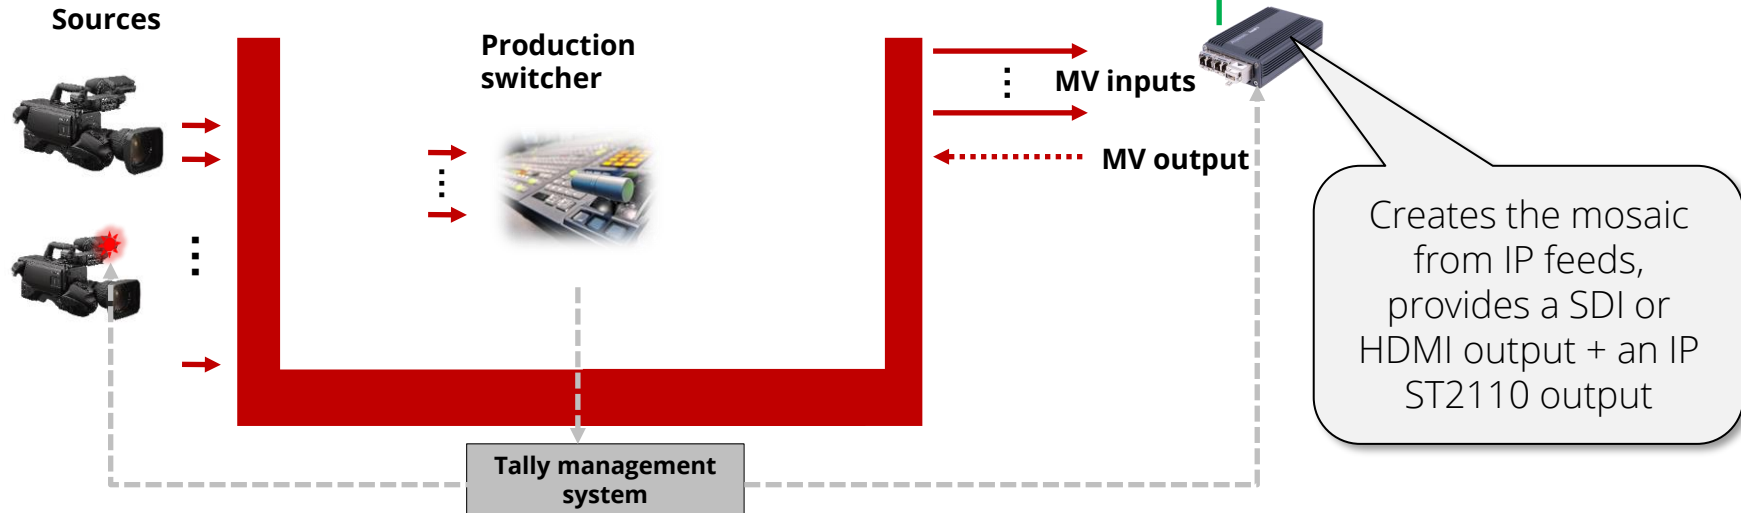

Comprehensive tally and dynamic label support

# MultiViewer at the core (Muon B)

# MultiViewer as a standalone (FusionN)

# MN IP MultiViewer

- Simple 4, 9 or 16 PiP MultiViewer
- Integrated nicely into an IP ST2110 system
- Savings of space – 512 inputs & 32 outputs in a single RU space
- IP Gateway + MultiViewer in ONE Edge Device
- Software-defined platforms

# MediorNet IP

# Remote Production and Contribution with JPEG-XS or JPEG-2000

## Low Bandwidth Signal Distribution

- Remote production
- Interfacility contribution
- Within the production facility

-  IP or SDI, HD - 3G or UHD signals
-  Can't compromise on image quality
-  Transmission Delay is crucial

# Remote Production and Contribution with JPEG-XS or JPEG-2000

- Smallest form-factor in the market
  - 64 CODEC in a single RU
  - 2 channels Edge Device
- IP and SDI I/Os

- ST2110-22 (TR-08)
- HD/3G/UHD signals
- 12:1 Visually lossless
- ~ 0.350ms processing delay

- ST2022-2 (TR-01)
- HD/3G signals
- 20:1 Visually lossless
- ~ 44ms Processing delay

# POV camera

- All in one **FusioN 6** POV camera support:
  - UHD SDI input
  - Genlock output
  - PTZ control bridge
  - ST2110 Uncompressed

# MN IP Encode/Decode solutions

- Integrated nicely into an IP ST2110 system
- Visually loss-less and low processing delay
- Small foot print - 64 CODECs in a single RU space
- Can be installed at the edge within the FusioN or in the VirtU-32 frame
- Software-defined platforms can be repurposed as desired

# IP and SDI Image Processing

## MN IP solution

MuoN B25

VirtU-32

## UDC APP Feature reach solutions:

**IP**

IP to IP ST2110

HD-3G-UHD capable

Up/Down/Cross conversion

Color Correction

## Important benefits:

- ✓ 32 Converters in a single RU
- ✓ Software-defined Platform
- ✓ Multiple functions in one chassis
- ✓ Cost savings (space & power)

Thank you!
